ECOSIGIL PARQUET

code SO9020

TECHNICAL DATA*(with room temperature of +23° C and 65% of relative air humidity)*

Appearance	white liquid
Viscosity	11 " Ford cup 4
Watering ratio	1 : 5
pH	10
Specific weight	1,01
Average yield of the product diluted 1 : 5	15-20 sq. m/l

DESCRIPTION

Water-repellent sealant on non-solvent base, to dampproof the joining lines (ends and edges) of varnished wooden floors. To be used especially on pre-finished varnished parquet.

ECOSIGIL PARQUET is water dilutable in a variable ratio, but can be employed also undiluted. The dilution allows to spread the product more easily and evenly. The ratio we recommend is: 1 part ECOSIGIL to 5 parts water.

PACKAGING

1-litre plastic bottles and 5-litre plastic cans.

DIRECTIONS FOR USE

Vacuum dust thoroughly and remove any possible residue of glue using our special spot-remover NET PARQUET. Afterwards clean the floor with our detergent DETER PARQUET.

Shake well ECOSIGIL PARQUET then pour the sufficient quantity in a bucket and add 5 parts of water. Rub the solution on to the surface with a soft floor-cloth or a mop. To enhance its water-repellent effectiveness, apply ECOSIGIL a second time after 30 minutes.

Immediately after drying, which requires normally 1 hour, the floor can be walked on and should be polished with an household polisher or a single-brush machine using the soft pad. The polishing is necessary to even the surface.

The product develops its water-repellence properties in about 2 days. After this time it is possible to do all the usual cleaning and maintenance operations.

WARNINGS

Shake well before using! The product is **not** suitable for unsealed parquet. It is dilutable only in water. SIGIL PARQUETS's water-repellent efficacy will last from 4 up to 8 months according to the wear the floor must undergo and the cleaning frequency. The treatment can be repeated whenever you think it's necessary.

For the regular maintenance of a parquet floor treated with ECOSIGIL we recommend our clean-and-wax products POLISH PARQUET (dilutable) and PRONTO POLISH PARQUET (ready to use).

Beware of freezing!

If the original unopened container is stored in a cool, dry place away from direct sun light, the product will keep for at least 12 months.
