

DETEROL

Wood soap

- ✓ Designed especially to clean and replenish oil-treated floors
- ✓ Ordinary maintenance
- ✓ Concentrated

Code **SO8203/8203BI**

Water-soluble detergent, made with coconut and soy oil derivatives, specially developed for ordinary maintenance of oiled wooden floors. DETEROL nourishes and cleans the wood and is suitable for professional as well as for domestic use. Available in two different versions (for transparent/coloured and white oil treatments).

APPLICATION

Vacuum the floor.

Dilute 1-2 caps of DETEROL in approx. 1 litre water.

Wipe the floor with a soft cloth or a mop soaked in the obtained solution and well wrung.

LET THE FLOOR DRY WITHOUT RINSING

No shining is necessary.

NOTICE

- Before starting maintenance on oiled wooden floors with DERGOS, wait 15-20 days to let the impregnation treatment dry completely.
- **We recommend the use of two buckets: one with the detergent solution, the other with clean (warm) water, to regularly rinse the cloth to remove dirt.**
- Only dilute the product in water.
- **ATTENTION!** As a general rule, wood floors should not be flooded with plenty of liquid, but wiped with moist and well wrung clothes or mops.
- At low temperatures the product could become cloudy, while at temperatures below 0° C it freezes: to restore DETEROL at its usual aspect, keep it at a minimum of 20° C for a few hours.

SAFETY INFORMATION

Ingredients (Reg. UE 648:2004):

- Soap 5% ≤ C < 15% • Perfumes.

Safety information data sheet available on demand.

TECHNICAL DATA

(based on room temperature of +23°C and 65% of relative air humidity)

Appearance	Yellowish transparent liquid
Viscosity	10°F4 ± 1 °F4
pH	10.0 ± 1.0
Specific weight	1.00 ± 0.02
Diluent	water
Max. dilution	1:100
Average yield of the diluted product	20-30 m ² /l

Protect from freezing!

If the original unopened container is stored in a cool and dry place, the product will keep for at least 12 months.
