SECTION 06: Accidental release measures

- 6.1 Personal precautions, protective equipment and emergency procedures Protection regulations (see point 7 and 8) to consider.
- 6.2 Environmental precautions:
 Inform respective authorities in case of seepage into water course or sewage system.
 Do not allow to enter sewers/ surface or ground water.
 Possible warning the neighbourhood.
- 6.3 Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Do not flush with water or aqueous cleansing agents
- 6.4 Reference to other sections
 See Section 7 for information on safe handling.
 See Section 8 for information on personal protection equipment.
 See Section 13 for disposal information.

SECTION 07: Handling and storage

• Handling:

7.1 Precautions for safe handling

- Ensure good ventilation/exhaustion at the workplace. Use only in well ventilated areas. Smoking, drinking and eating are not permitted at the working place! Keep out of the reach of children. Do not breathe in fumes. Do not empty into drains.
- Information about fire and explosion protection:

Keep ignition sources away - Do not smoke.

Protect against electrostatic charges.

Fumes can combine with air to form an explosive mixture.

Vapours are heavier than air.

Soiled material such as cleaning rags, paper tissues and protective clothing can spontaneously selfignite after several hours. To avoid the danger of fire, all soiled material should be soaked in water and stored in a closed metal container.

Application by spraying:

If any persons, regardless whether or not they actually perform spray-painting themselves, are working inside the spraying chamber during varnishing there is the risk that they will be exposed to aerosols and fumes of solvent. Particularly in regard to spraying mist it is rather improbable that the maximum permissible values for dust particles will be constantly met. Under such conditions it is recommended to wear breathing masks (half masks with particle filter of at least filter class P 2 or force-ventilated breathing masks) until aerosol and solvent fumes concentrations will be again under the limit value for exposition.

- 7.2 Conditions for safe storage, including any incompatibilities
- Storage:
- Requirements to be met by storerooms and receptacles:

The official regulations for the storage of paints and varnishes and Chemicals must be observed. Information about storage in one common storage facility:

- Store away from foodstuffs. • Further information about storage conditions:
- Store in cool, dry conditions in well sealed receptacles.
- Storage class:
- 7.3 Specific end use(s)
 - For more information, please refer to the technical data sheet.

- Personal protective equipment:
- General protective and hygienic measures: Immediately remove all soiled and contaminated clothing Avoid contact with the eyes and skin.
- Respiratory protection: If the solvent concentration is above WEL limits, a breathing mask approved for this purpose must be worn. Filter A2/P2.

• Protection of hands: The glove material has to be impermeable and resistant to the product the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Preventive skin protection by use of skin-protecting agents is recommended. Protective gloves made of latex / neoprene. Degradation effect G to E Instalment of permeation E to ND (< 0.9 μ g / cm 2 / min). Protective factor index: special subject class 6. After use of gloves apply skin-cleaning agents and skin cosmetics.

- Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
 - · Eye protection: Safety glasses
- Body protection: Protective work clothing

9.1 Information on basic physical and che	emical properties
General Information	
Appearance:	
Form:	Liquid
Colour:	Colourless
Odour:	Characteristic
Odour threshold:	Not determined.
pH-value:	Not usable on solvent preparations.
Change in condition Phase transfer: fluid	- solid
Melting point/freezing point:	Undetermined.
Initial boiling point and boiling range:	132,0 °C
Flash point (approximately):	33,6 °C DIN 51 755
Flammability (solid, gas):	Not applicable.
Ignition temperature (approximately):	240,00 °C (lowest value of the single components)
Decomposition temperature:	Not determined.
Auto-ignition temperature:	Product is not selfigniting. Due to the danger of self-ignition soaked cloths, however, should be moistened with water and eliminated then
Explosive properties:	Product is not explosive. However, formation of explosive air/vapour mixtures are possible.
Explosion limits:	
Lower:	0,60 Vol %
Upper:	6,50 Vol %
Oxidising properties	Not determined
Vapour pressure:	Not determined.
Density:	0,9030 g/cm3
Vapour density	Not determined.
Evaporation rate	Not applicable.
Solubility in / Miscibility with	Organic solvents
water:	Insoluble.
Partition coefficient: n-octanol/water:	Not determined.

SECTION 10: Stability and reactivity

- **10.1 Reactivity** On storage in containers no traffic laws intolerances are to be expected with the tank shell.
- **10.2 Chemical stability** Stable at room temperature
- Thermal decomposition / conditions to be avoided: No decomposition if used and stored according to specifications.
- 10.3 Possibility of hazardous reactions Forms explosive gases/fumes. Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomised.
 10.4 Conditions to avoid
- No further relevant information available.
- 10.5 Incompatible materials: No further relevant information available.
- 10.6 Hazardous decomposition products: Flammable gases/vapours

SECTIO	115: Regulatory information
• 15.1 mixtu	Safety, health and environmental regulations/legislation specific for the substance or re
• Labe	ling according to EU guidelines:
The p	roduct has been classified and marked in accordance with EU Directives / Ordinance on dous Materials.
	JLATION (EC) No 1907/2006 ANNEX XVII
	tions of restriction: 3
• Natio	nal regulations:
• Infor	nation about limitation of use:
Pregr	ant and breastfeeding women and young persons.
	Chemical safety assessment:
	is product no appraisal of substance safety was carried out. Information from exposure rios of the following substances were integrated into section 1-16:
	carbons, C9-C11, n-alkanes, isoalkanes, cyclics, < 2% aromatics ypropylacetat
	hoxy-2-propanol
The c	ompliance with the application conditions and measures for risk minimisation contained in thi
	ial safety data sheet ensures the conformity with the existing exposure scenarios.
Storage	e class:

SECTION 16: Other information

- Other information:
- Reasons for changes

P-statements were adjusted according to the classification.

- Relevant phrases
 - H226 Flammable liquid and vapour.
 - H302 Harmful if swallowed.
 - H304 May be fatal if swallowed and enters airways.
 - H315 Causes skin irritation.
 - H317 May cause an allergic skin reaction.
- H318 Causes serious eye damage.
- H330 Fatal if inhaled.
- H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.
- H335 May cause respiratory irritation.
- H336 May cause drowsiness or dizziness.
- H411 Toxic to aquatic life with long lasting effects.

Classification according to Regulation (EC) No 1272/2008
 The classification of the mixture is generally based on the calculation method using substance data according to Regulation (EC) No 1272/2008.
